REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance.

The instant invention generally relates to the field of image processing having image understanding that automatically classifies pictures by events and the like and more particularly, to such automatic classification of pictures by time and data analysis and by block-base analysis which selectively compares blocks of the images with each other.

Claim 1 representative of claim 17, providing a method for automatically classifying images into events, the method comprising the steps of, (a) receiving a plurality of images having either or both date and/or time of image capture, (b) determining one or more largest time differences of the plurality of images based on clustering of the images, (c) separating the plurality of images into the events based on having one or more boundaries between events which one or more boundaries correspond to the one or more largest time differences.

The invention is novel due to the receiving a plurality of images having either or both date and/or time of image capture, determining **one or more largest time differences of the plurality of images based on clustering of the images**, and separating the plurality of images into the events **based on having one or more boundaries between events which one or more boundaries correspond to the one or more largest time differences**.

The closest prior art of record (Auty et al) teaches vehicle monitoring system includes a camera node for monitoring moments of an objects to determine an acquisition time when an image of the object is to be acquired and acquiring the image at the predetermined time, and monitoring the speed of vehicles over relatively long distances. But do not suggest one or more

largest time differences of the plurality of images based on clustering of the images, captured at different dates an/or time into semantically related events, also Auty fails teach determine time differences correspond to the one or more boundaries.

These key features in combination with the other features of the claimed invention are neither taught nor suggested by the art of record.

Claims 1-26 are allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
